ROTOLOK SLIMSLIDES

HAND/CHAIN WHEEL SLIMSLIDE

Rotolok Slim-Slides are used when isolating the flow of dry free flowing products such as powder, granules and dust.

Designed for use on various types of gravity feed applications, e.g. silos, hoppers, screw conveyors etc. where non-automatic operation is required.

This cost effective valve is available with round or square inlets measuring between 125mm to 350mm, with options available for single pneumatic, motorised or manual operation.

KEY FEATURES

Valve can be supplied with optional limit switches to indicate open /closed positions. Its compact design is incorporated on applications where minimum space is available. Manufactured on CNC machines ensures; quick deliveries, interchangeability, accurate components and cost effectiveness. The main feature of the Slim-Slide are;

- A compact design
- No lodgement points
- Dust tight to atmosphere on in-line applications
- Stainless steel slide plate
- Aluminium body
- Nylon support studs
- Dust seals
- Available in Round and Square inlets.
- Operation through a lead screw. If chain/chainwheel is required please specify length of chain.

Drillings are Rotolok standards. Variations can be made.

PNEUMATIC SLIMSLIDE

Designed for use on various types of gravity feed applications, e.g. silos, hoppers, screw conveyors etc. where automatic operation is required. This cost effective valve is available with round or square inlets measuring between 125mm to 350mm, with options available for manual, motorised or lead screw operation.

Rotolok's Slim-Slide has all the features of the Manual version, but can be operated remotely as required in process control.

KEY FEATURES

Valve is supplied complete with single solenoid spring return valve and limit switches to indicate open/closed positions. Cylinder and solenoid is pre-piped ready for installation. Its compact design is incorporated on applications where minimum space is available. Manufactured on CNC machines ensures; quick deliveries, interchangeability, accurate components and cost effectiveness. The main feature of the Slim-Slide are;

- Compact Design
- No Lodgement Points
- Dust Tight to Atmosphere on in-line applications
- Stainless Steel Slide Plate
- Aluminium Body
- Nylon Support Studs
- Stainless Steel Slide Plate
- Dust Seals
- Round and Square Inlets
- Complete with Solenoid Valve and Limit Switches

MOTORISED SLIMSLIDE

Designed for use on various types of gravity feed applications, e.g. silos, hoppers, screw conveyors etc. where automatic operation is required. This cost effective valve is available with round or square inlets measuring between 125mm to 350mm, with options available for manual, single pneumatic or lead screw operation.

Rotolok's Slim-Slide has all the features of the Manual version, but can be operated remotely as required in process control.

KEY FEATURES

Valve is supplied complete with limit switches to indicate open/closed positions. Motor supplied with belt drive in enclosed guard. Its compact design is incorporated on applications where minimum space is available. Manufactured on CNC machines ensures; quick deliveries, interchangeability, accurate components and cost effectiveness. The main feature of the Slim-Slide are;

- Compact Design
- No Lodgement Points
- Dust Tight to Atmosphere on in-line applications
- Stainless Steel Slide Plate
- Aluminium Body
- Nylon Support Studs
- Stainless Steel Slide Plate
- Dust Seals
- Round and Square Inlets
- Complete with Limit Switches, as detailed in the drawing

MANUAL SLIMSLIDE

Rotolok Slim-Slides are used when isolating the flow of dry free flowing products such as powder, granules and dust. Ideal for various types of gravity feed applications e.g. silos, hoppers, screw conveyors etc., where easy access or infrequent use lends itself to manual operations. This cost effective valve is available with round or square inlets measuring between 125mm to 350mm, with options available for single pneumatic, motorised or lead screw operation.

KEY FEATURES

The Slim Slide by careful design has a build up facility and by adding further components it can easily be converted from the manual version to: single pneumatic, screw type or motorised. Its compact design is incorporated on applications where minimum space is available. Manufactured on CNC machines ensures; quick deliveries, interchangeability, accurate components and cost effectiveness. The main feature of the Slim-Slide are;

- Compact Design
- No Lodgement Points
- Minimum Dust Escapement
- Precision Machined
- Aluminium Body
- Nylon Support Studs
- Stainless Steel Slide Plate
- Dust Seals
- Round and Square Inlets

OTHER ROTOLOK PRODUCTS

As well as the Slim Slides, Rotolok manufacture and supply a range of other products in Cast Iron for use in conveying systems.

These include, but are not limited to: Blo-line pipe coupling; Slide Gates with Pneumatic, Motorised or Manual operation; Rotary Valve; Dust Collector Valve; Roundhead Valve; Blowing Seals and various Diverter Valves.

For more information, please visit our website or contact our sales team.

A Standard Rotary Valve that can be made to suit most applications with a variety of construction materials and rotors

A Cast Iron conveying diverter valve. Available with flanged or spigotted connections to fit existing conveying systems

A typical Blowing Seal with a square inlet used in pneumatic conveying systems.

A Standard Plug Diverter Valve. The valve has a rugged cast iron body and is suitable for abrasive or high pressure applications
